AccessPOINT Portal

Secure, reliable 24/7 access to your case audio and annotations from anywhere in the world

When you're debating a verdict or preparing your final arguments, you need your case information available anytime, anywhere. The AccessPOINT Portal provides judges, lawyers, and other authorized parties with secure, password-protected access to court recordings, annotations, and transcription services from their office, home computer, or any computer with an Internet connection. The AccessPOINT Portal is available 24 hours a day and every transaction is securely protected.

Specifications

AccessPOINT Portal Advantages

The AccessPOINT Portal gives you secure, reliable access to your case audio and annotations anytime you need it, from any computer with an Internet connection. You can also order full or partial transcripts of your recorded audio.

Solution Advantages

- Lets you instantly access your case audio and annotations anytime from any computer with Internet access
- Offers 24/7 access to meet your schedule
- Allows you to assign access on a case-per-case basis so that only authorized users can listen to audio
- Allows passive access, does not allow users to delete or change audio
- Lets you order and download full or partial transcripts of case audio
- Provides instant access to transcriptionists for faster turnaround times, including near-real time
- Lets you deal with transcriptionists anywhere in the world instantly, with no shipping costs
- High-performance network means fast, secure transfer and retrieval over the Internet
- Provides secure online access to VIQ's judicial scheduling solution
- Offers secure online billing through an e-commerce server
- VIQ partners with Tier-1 hardware and networking solutions providers using brand-name products and applications to guarantee top performance

Why choose the AccessPOINT Portal?

It's easy... You can log into the AccessPOINT Portal from any computer with an Internet connection!

It's fast... Instant access to audio and transcripts delivered to you in near-real time!

It's secure... All transactions are securely protected by an e-commerce engine.

It's reliable... VIQ's top-tier data center guarantees network performance and availability.

The AccessPOINT Portal allows authorized users to have passive access to their case audio and annotations. Users can also order full or partial transcripts.

- Portal hosted at client site to allow customized security and accessibility settings
- Offers strict control over which audio can be accessed and who can access it
- Allows only tamper-proof, passive access, does not allow users to delete or change audio
- Secured Internet Information Server (IIS) as front-end and secured Microsoft SQL database as back-end
- Built on a tried and true web server platform (IIS) that includes industry-standard support for server-side SSL
- Uses secure logins and passwords for user authentication
- Uses an e-commerce engine for secure online billing
- Offers secure transcription through VIQ's NetScribe solution
- NetScribe Server (for transcription) is located in the Q9 data center, connected to more than 24 major providers and more than 69 minor providers, providing 100% uptime, availability, and redundancy
