Notes to Interim Consolidated Financial Statements

1. Incorporation and Corporate Restructuring

VIQ Solutions Inc. (“VIQ Solutions” or the “Corporation”) was incorporated by Certificate of Incorporation pursuant to the provisions of the *Business Corporations Act* (Alberta) on November 10, 2004. On December 23, 2004, pursuant to a formal plan of arrangement (the “Arrangement”) by VoiceIQ Inc. (“VoiceIQ”), the Corporation purchased all the assets of VoiceIQ, being the voice capture and digitization assets and business of VoiceIQ in exchange for 36,776,310 shares of the Corporation (the “Acquisition”). As part of the Acquisition, VIQ Solutions assumed all of VoiceIQ’s contractual obligations and liabilities as of the date of the Arrangement that were not compromised by VoiceIQ under the Companies Creditors Arrangement Act (Canada) (“CCAA”). As part of the Arrangement, VIQ Solutions issued 2,000,000 common shares to certain creditors of VoiceIQ and an additional 1,333,333 common shares to a creditor of VoiceIQ as partial consideration of debt settlement under the CCAA. Until the Arrangement was implemented, VIQ Solutions did not carry on any business and had no material assets or liabilities. The Corporation commenced active business on December 24, 2004.

2. Going Concern Assumption

These interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a “going concern”, which assumes that the Corporation will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of its operations. VIQ Solutions has incurred operating losses during the year. The following transactions demonstrate the Corporation’s ability to raise capital:

- In January 2006, the balance of the Corporation’s \$1.28 million secured debenture was converted into common shares and warrants of the Corporation;
- In the first quarter of 2006, the Corporation obtained a \$500,000 six-month secured bridge loan. The bridge loan bears interest at a rate of 10% per annum payable upon repayment of the loan. During the second quarter, the Corporation extended the bridge loan to March 31, 2007;
- In the second quarter, the Corporation finalized a private placement in the amount of \$587,100 for 3,090,000 common shares at a price of \$0.19 per share; and
- During the period, the Corporation obtained two secured bridge loans for \$455,000 and \$270,000, each for a period of two years. The bridge loans bear interest at a rate of 12%, payable annually and include the issuance to the lenders of 3,625,000 common share purchase warrants, which have an exercise price of \$0.16 for the first year and \$0.24 for the second year.

Management believes that these actions make the going concern basis appropriate. If the going concern basis is not appropriate, adjustments may be necessary to the carrying amounts and/or classification of assets and liabilities, and expenses in these financial statements.

The Corporation’s ability to continue as a going concern is dependent on its ability to achieve and maintain profitable operations. These interim consolidated financial statements do not reflect any adjustments to reflect the possible future effects on the recoverability and the classification of assets and of the amounts and the classification of liabilities that may result if the going concern assumption were not appropriate. Such adjustments may be material.

3. Summary of Significant Accounting Policies

Nature of Operations

VIQ Solutions develops software and provides solutions that capture, digitize, compress and store voice from a variety of sources, including microphones, telephones and hand-held recorders. The software can be used to securely manage the flow of voice files over virtually any computer network, including the Internet. The Corporation supplies, through a network of distributors and channel partners, solutions to end-users including individual medical clinics, legislative assemblies, courthouses and quasi-judicial agencies. NetScribe, a sophisticated web-based workflow management switch, provides anywhere anytime transcription workflow capabilities worldwide.

The Corporation also provides transcription services around the world to a variety of clients including medical, courtrooms, legislative assemblies, hearing rooms and quasi-judicial clients in various countries including Canada, the United States, Australia, New Zealand and Ireland.

Accounting Principles

The consolidated interim financial statements are prepared in accordance with Canadian generally accepted accounting principles and follow the same accounting policies as for the financial statements for the year ended December 31, 2005 and should be read in conjunction with the December 31, 2005 audited financial statements of the Corporation.

Financial Instruments with Separate Components

The secured bridge loan and associated warrants are segregated into their debt and equity components at the date of issue. The equity component, representing the value allocated to the warrants at their inception, has been included in contributed surplus. The remaining component, representing the value ascribed to the debt portion, has been classified as long-term debt. These components have been measured at their respective fair values on the date the financial instruments were issued. The carrying value of the warrants is accreted to the original face value of the secured bridge loans over the respective terms of the secured bridge loans.

During the period, the Corporation entered into two secured bridge loans with a face value of \$455,000 and \$270,000, each for a period of two years. The bridge loans bear interest at a rate of 12%, payable annually and include the issuance to the lenders of collectively 3,625,000 common share purchase warrants, which have an exercise price of \$0.16 for the first year and \$0.24 for the second year.

The debt portion was initially recorded on the balance sheet with a value of \$670,396, which was determined using the Black Scholes method to value the warrants. The difference of \$54,604, between the face amount and the estimated fair value of the debt component was reflected as contributed surplus and will be accreted over the two year life of the loan and is charged to the consolidated statement of operations as interest expense.

Basis of Consolidation

On December 23, 2004, the Corporation acquired all the assets and assumed all the associated contractual obligations and liabilities (to the extent that they were not compromised under the CCAA) from VoiceIQ including its wholly-owned subsidiary VIQ Australia Pty. Limited and VIQ Australia Pty. Limited's wholly-owned subsidiaries Spark & Cannon Pty. Ltd., Spark & Cannon (SA) Pty. Ltd. (collectively referred to as "Spark & Cannon") and VIQ Solutions NZ Limited (formally VoiceIQ NZ Limited). On July 1, 2006, Spark & Cannon Pty. Ltd. was amalgamated into Spark & Cannon (SA) Pty. Ltd. at which time Spark & Cannon (SA) Pty. Ltd. changed its name to Spark & Cannon Australasia Pty. Limited.

In 2005, the Corporation incorporated a new subsidiary, VIQ Solutions (U.S.) Inc., which has been included in the

interim consolidated financial statements. On December 23, 2005, the Corporation acquired all the outstanding common shares of International Reporting Inc. (“International Reporting”).

The Interim Consolidated Financial Statements include the accounts of VIQ Solutions, the operations of the acquired assets of VoiceIQ as of the date of acquisition being December 23, 2004, the operations of VIQ Solutions (U.S.) Inc. and the operations of International Reporting as of the date of acquisition being December 23, 2005.

Use of Estimates

In preparing the Corporation's interim consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and reported amounts of revenue and expenses. Actual results could differ from these estimates.

Significant areas requiring the use of management estimates relate to the determination of the valuation of goodwill and intangible assets, the useful lives of property, plant and equipment and other assets for amortization purposes, amounts recorded as accrued liabilities and the fair values of financial instruments.

4. Business Acquisitions

On December 23, 2005, the Corporation signed and closed a share purchase agreement to acquire all of the common shares of International Reporting, a transcription and recording services company. The aggregate purchase price was \$950,000 satisfied by \$500,000 of cash and two unsecured notes of \$225,000 each bearing interest at 5% to be repaid on the first and second anniversaries of the acquisition. The Corporation may be required to pay additional consideration of varying amounts to the vendors in the event that certain sales and net earnings targets are met.

The results of International Reporting's operations have been included in the interim consolidated financial statements since the agreement took effect on December 23, 2005. Details of the assets acquired and liabilities assumed at their fair values are as follows:

In January 2006, the remaining balance of the secured convertible debenture was converted into common shares and warrants of the Corporation.

The fair value of the convertible debenture approximated its carrying value and accordingly, no value was assigned to the equity component of the convertible debenture.
