The software can be used to securely manage the flow of voice files over virtually any computer network, including the Internet. The Corporation also provides recording and transcription services directly or by contracting to various suppliers around the world to a variety of clients including medical, courtrooms, legislative assemblies, hearing rooms, inquiries and quasi-judicial clients in numerous countries including Canada, the United States, Australia, South Africa, and Ireland.

2. Going Concern Uncertainty

These interim consolidated financial statements have been prepared on the basis of accounting principles applicable to a “going concern”, which assumes that the Corporation will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of its operations. VIQ Solutions has incurred operating losses during the current and prior years.

Historically, management has consistently been able to raise sufficient funds to continue operations. Further, the Corporation has significantly decreased its losses over time. Management believes that these actions make the going concern basis appropriate.

The Corporation’s ability to continue as a going concern is dependent on its ability to achieve and maintain profitable operations and may require management to obtain future financing. These interim consolidated financial statements do not reflect any adjustments to reflect the possible future effects on the recoverability and the classification of assets and of the amounts and the classification of liabilities that may result if the going concern assumption were not appropriate. Such adjustments may be material.

3. Basis of Presentation

The consolidated interim financial statements are prepared in accordance with Canadian generally accepted accounting principles and follow the same accounting policies as for the financial statements for the year ended December 31, 2006, with the exception of the changes in accounting policies described in note 4. These interim consolidated financial statements should be read in conjunction with the Corporation’s audited consolidated financial statements and notes thereto for the year ended December 31, 2006.

4. Adoption of New Accounting Policies

Effective January 1, 2007, the Corporation adopted three new accounting standards that were issued by the Canadian Institute of Chartered Accountants (“CICA”): Comprehensive Income (“Section 1530”); Financial Instruments – Recognition and Measurement (“Section 3855”); and Hedges (“Section 3865”). These standards have been adopted on a prospective basis, with the exception of the cumulative translation adjustment which has been applied retroactively.

Comprehensive Income

Section 1530 requires the presentation of comprehensive income, which consists of net income and other comprehensive income. Other comprehensive income represents changes in shareholders' equity and includes foreign exchange gains and losses on the translation of the financial statements of the Corporation's self-sustaining foreign operations, previously recorded in a separate section of shareholders' equity, and is now presented as accumulated other comprehensive income. The Corporation's earnings per share presented on the interim consolidated statements of income are based upon its net income and not its comprehensive income.

Financial Instruments – Recognition and Measurement

Section 3855 prescribes when a financial asset, financial liability, or non-financial derivative is to be recognized on the balance sheet as well as its measurement amount. This section also specifies how gains and losses on financial instruments are to be presented.

The Corporation's receivables are classified as loans and receivables. After their initial fair value measurement, they are measured at amortized cost using the effective interest rate method which generally corresponds to cost.

The Corporation's payables and accruals, short-term and long-term debt and obligations under capital lease are classified as financial liabilities. After their initial fair value measurement, they are measured at amortized cost using the effective interest rate method which generally corresponds to cost.

Hedges

Section 3865 expands on the existing Accounting Guideline 13 – "Hedging Relationships" by specifying how hedge accounting is to be applied and what disclosures are necessary when it is applied.

As at September 30, 2007, the Corporation did not hold any financial instruments for which it has elected to apply hedge accounting under Section 3865.
